Abstrak

Penelitian ini bertujuan untuk mengetahui pemanfaatan Senayan *Library Management System* (SLiMS) Perpustakaan SMK di DIY khususnya pada sistem katalogisasi, *membership* dan sirkulasi. Disamping itu dengan penelitian ini diharapkan diperoleh hasil mengenai fitur Senayan yang pemanfaatannya paling optimal dan fitur mana yang pemanfaatannya paling rendah.

Penelitian ini menggunakan metode penelitian survei dengan instrumen lembar observasi dan angket. Subjek penelitian yang digunakan adalah siswa, guru dan pustakawan di tujuh SMK di DIY. Tujuh sekolah tersebut ialah SMKN 4 Yogyakarta, SMKN 5 Yogyakarta, SMKN 6 Yogyakarta, SMKN 7 Yogyakarta, SMK Piri 1 Yogyakarta, SMK Muhammadiyah 3 Yogyakarta dan SMKN 1 Depok Sleman. Analisis data yang digunakan adalah teknik analisis deskriptif.

Hasil analisis data menunjukkan pemanfaatan Senayan *Library Management System* (SLiMS) oleh pustakawan perpustakaan SMK di DIY sangat baik dengan persentase 81,88%, dengan persentase masing-masing variabel yaitu variabel katalogisasi 82,00%, variabel *membership* 81,43% dan variabel sirkulasi 82,38%. Sedangkan untuk pemanfaatan Senayan *Library Management System* (SLiMS) oleh guru dan siswa ialah 80,28% dengan persentase masing-masing yaitu variabel katalogisasi 89,86%, variabel *membership* 74,63% dan variabel sirkulasi 81,96%. Fitur SLiMS yang penggunaannya paling optimal oleh pengguna perpustakaan dari keseluruhan SMK di DIY ialah variabel katalogisasi dengan persentase 89,86%, sedangkan variabel yang masih perlu ditingkatkan lagi pemanfaatannya ialah variabel *membership* dengan persentase 74,63%. Pemanfaatan SLiMS oleh pustakawan diperoleh hasil yaitu variabel yang paling optimal digunakan ialah variabel sirkulasi dengan persentase 82,38% dan terendah variabel *membership* dengan persentase 81,43%.

Kata Kunci: Senayan *Library Management System*, Perpustakaan

Abstract

This study aims to examine the utilization of Senayan Library Management System SMK Library in DIY, especially the cataloging, membership and circulation. Beside that with this research obtained results about expected to the Senayan feature on utilization was the most optimal and which features the the lowest utilization.

This study uses survey research method with observation instruments sheets and questionnaires. The research subjects used were students, teachers and librarians in seven vocational schools in DIY. Seven school are SMKN 4 Yogyakarta, SMKN 5 Yogyakarta, SMKN 6 Yogyakarta, SMKN 7 Yogyakarta, SMK Piri 1 Yogyakarta, SMK Muhammadiyah 3 Yogyakarta and SMKN 1 Depok Sleman. The data analysis used was descriptive analysis techniques.

The data analysis results showed utilization of Senayan Library Management System by SMK Librarians in DIY very well with the percentage of 81,88%, with the percentage of each variable is the cataloging variable 82,00%, membership variable 81, 43% and circulation variable 82,38%. As for the

utilization of Senayan Library Management System by teacher and student are each cataloging variable 89,86%, membership variable 74, 63% and circulation variable 81,96%. The SLiMS features that most optimal utilization by library user of all vocational school in DIY is cataloging variable with percentage 89,86%, while the variable that still need to be improved utilization is membership variable with percentage 74,63%. The utilization SLiMS by librarians obtained results which variables are used most optimal is circulation variable with percentage 82,38% and the lowest is membership variable with percentage 81,43%
