ABSTRAK

Penelitian ini bertujuan untuk: mengetahui pengaruh jenis instansi tempat siswa melaksanakan praktik kerja lapangan terhadap nilai uji kompetensi kejuruan, pengaruh jenis pekerjaan saat siswa melaksanakan praktik kerja lapangan terhadap nilai uji kompetensi kejuruan, pengaruh praktik kerja lapangan terhadap nilai uji kompetensi kejuruan, dan mengetahui sumbangan efektif pengaruh praktik kerja lapangan terhadap nilai uji kompetensi kejuruan.

Penelitian ini merupakan penelitian *ex-post facto* menggunakan pendekatan korelasional. Populasi penelitian adalah semua siswa kelas XIII SMK Negeri 2 Depok Jurusan Teknik Pemesinan sebanyak 45 siswa dengan jumlah sampel penelitian 40 responden. Teknik pengambilan sampel yang digunakan adalah teknik *simple random sampling*. Data dikumpulkan dengan kuesioner, kemudian dianalisis deskriptif, korelasi dan regresi.

Hasil penelitian diketahui bahwa: (1) terdapat pengaruh positif dan signifikan antara praktik kerja lapangan terhadap nilai uji kompetensi kejuruan siswa SMK Negeri 2 Depok, (2) diketahui terdapat pengaruh positif antara jenis instansi tempat praktik kerja lapangan terhadap nilai uji kompetensi kejuruan siswa SMK Negeri 2 Depok, (3) diketahui terdapat pengaruh positif antara jenis pekerjaan saat praktik kerja lapangan terhadap nilai uji kompetensi kejuruan siswa SMK Negeri 2 Depok, (4) sumbangan efektif yang diberikan variabel praktik kerja lapangan terhadap nilai uji kompetensi kejuruan siswa di SMK Negeri 2 Depok adalah sebesar 16,9% (jenis instansi tempat praktik kerja lapangan 8,12%, dan jenis pekerjaan saat praktik kerja lapangan 8,78%).

Kata kunci: praktik kerja lapangan, nilai, uji kompetensi kejuruan

**THE EFFECT OF FIELD WORK TRAINING TOWARD
VOCATIONAL COMPETENCE EXAM'S SCORES OF
DEPARTMENT OF MECHANICAL ENGINEERING
STUDENTS OF SMKN 2 DEPOK**

ABSTRACT

The purpose of this research is: to find out the effect of student's place for field work training toward vocational competence exam's scores, to find out the effect of student's jobs for field work training toward vocational competence exam's scores, to find out the effect of student's field work training toward vocational competence exam's scores, and to find out effective contribution given by the effect of students field work training toward vocational competence test exam's scores

This research is an ex-post facto research using correlational approach. The research population was all students of class XIII SMK N 2 Depok Department of Mechanical Engineering as many as 45 students with the amount of sample of 40 respondents. The sampling technique used Simple Random Sampling technique. Data were collected by questionnaire and then analyzed descriptively, correlation and regression.

The research results are: (1) there are a positive and a significant effect between field work training toward vocational competence exam's scores students of SMK N 2 Depok, (2) there are a positive effect between place for field work training toward students's vocational competence exam's scores students of SMK N 2 Depok, (3) there are a positive effect between student's jobs for field work training toward vocational competence exam's scores students of SMK N 2 Depok, (4) effective contribution given by field work training variable toward students's vocational competence exam's scores in SMK N 2 Depok about 16,90 %. (field work training place 8,12%, and field work training jobs 8,78%).

Keywords : field work training, score, vocational competence's exam
