ABSTRACT

Imroatu Sholihat. A Shift Analysis in English – Indonesian Translation of the Movie Subtitle of *The Maze Runner*. **Thesis. Yogyakarta: Graduate School, Yogyakarta State University, 2019.**

The purpose of this current research was to explain: (1) the occurrence of translation shifts, (2) the degree of the equivalence, (3) the types of loss and gain and (4) the possible reasons for the occurrence of a shift in the translation of *The Maze Runner* subtitle.

This research was a descriptive qualitative study. The data source was taken from the English and Indonesian translation version of the movie subtitle of *The Maze Runner*. The unit of analysis in this study consisted of words, phrases, clauses and sentences which contained shifts. In collecting the data, the researcher used observation technique. Field note was used to note the data on the data sheet. In analyzing the data, there were three stages which consisted of data reduction, data display, and conclusion drawing.

The finding showed that there were 362 data containing shift. All types of shift were applied at a different rate. These were level shift, structure shift, class shift, unit shift and intra-system shift. Structure shift was found as the most frequent and unit shift took second place with an almost similar number. There were four degrees of equivalence, namely optimum translation, near optimum translation, weak translation, and zero translation. Most of the applications of shift were considered to reach optimum and near optimum translation which appeared to show that the translation shift tended to maintain the source language message in the target language. Furthermore, the analysis also demonstrated that a certain number of shift also experienced loss and gain. Loss and gain occurred in the levels of word, phrase and clause. The last, the finding revealed that there were a number of the possible reasons for the occurrence of shift in the translation of *The Maze Runner* subtitle (1) shift may occur due to obligatory or optional change and (2) shift has a tendency to occur due to the existence of some rules in translating subtitles such as limited time and numbers of words.

Keywords: *translation shift, equivalence, loss and gain, translation, subtitle.*

ABSTRAK

Imroatu Sholihat. Analisis pergeseran pada terjemahan subtitle bahasa Inggris-bahasa Indonesia dalam film *The Maze Runner*. **Tesis. Yogyakarta: Program Pasca Sarjana, Universitas Negeri Yogyakarta, 2019.**

Tujuan dari penelitian ini adalah untuk menjelaskan: (1) terjadinya pergeseran dalam penerjemahan, (2) tingkat kesepadanannya, (3) jenis-jenis *loss and gain*, (4) alasan yang memungkinkan terjadinya pergeseran dalam penerjemahan subtitle film *The Maze Runner*.

Penelitian ini merupakan penelitian deskriptif qualitatif. Sumber data diambil dari subtitle film *The Maze Runner* baik dalam versi bahasa Inggris dan juga terjemahannya. Unit analisis dalam penelitian ini terdiri dari kata, frasa, klausa dan kalimat yang mengandung pergeseran. Dalam mengumpulkan data, peneliti menggunakan teknik observasi. Catatan lapangan digunakan untuk mencatat data pada lembar data. Dalam menganalisis data, terdapat tiga tahapan yang terdiri dari reduksi data, tampilan data, dan penarikan kesimpulan.

Hasil menunjukkan bahwa terdapat 362 data mengandung pergeseran. Semua jenis pergeseran diterapkan dalam jumlah yang berbeda. Terdapat pergeseran level, pergeseran struktur, pergeseran kelas, pergeseran unit dan pergeseran intra-system. Pergeseran struktur ditemukan sebagai pergeseran yang paling sering dan pergeseran unit berada diurutan kedua dengan jumlah yang hampir sama. Terdapat empat tingkatan kesepadanannya, yaitu *optimum translation*, *near optimum translation*, *weak translation*, dan *zero translation*. Sebagian besar penggunaan pergeseran penerjemahan mampu mencapai *optimum* dan *near optimum translation*, yang menunjukkan bahwa pergeseran terjemahan cenderung mempertahankan pesan bahasa sumber dalam bahasa sasaran. Selanjutnya, hasil analisis menunjukkan bahwa dalam sejumlah data yang mengandung pergeseran juga mengalami *loss* dan *gain*. *Loss* dan *gain* terjadi pada level kata, frasa, klausa. Yang terakhir, temuan ini mengungkapkan bahwa ada sejumlah kemungkinan alasan terjadinya pergeseran dalam terjemahan *The Maze Runner* subtitle (1) pergeseran dapat terjadi karena perubahan wajib atau pilihan, dan (2) pergeseran cenderung terjadi karena adanya beberapa aturan dalam menerjemahkan subtitle seperti keterbatasan pada waktu dan jumlah kata.

Kata kunci: *pergeseran terjemahan, kesepadanannya, loss and gain, terjemahan, subtitle.*

RATIFICATION SHEET

A SHIFT ANALYSIS IN ENGLISH – INDONESIAN TRANSLATION OF THE MOVIE SUBTITLE OF THE MAZE RUNNER

ACKNOWLEDGEMENT

First and foremost, all praises be to Allah SWT for the chance and the blessing he gave all this time especially for the strength in the process of completing this thesis until it could be finished.

I would like to express my sincere gratitude and appreciation to my supervisor, Mr. Ashadi, S.Pd., M.Hum., Ed.D for the guidance and encouragement throughout the entire process in writing this thesis. His supervision in giving correction and suggestions had brought this thesis towards a well completion.

I would also like to extend my appreciation to the rector and director of graduate school of Yogyakarta State University, the head of applied linguistic study program and all lecturers who have given me their immense knowledge

This thesis is dedicated to my beloved parent for their endless love, prayers, and continuous support. I am forever grateful for having the opportunity to learn everything by their advice. I love you so much. Also, I would like to express my deepest gratitude to my brother, Ahamd Fauzan who supports me during the lecturer process both financially and morally. Alhamdulillahi jaza kumullohi khoiroh.

I also give my heartiest thank to my classmate in applied linguistic 2017 A and translation class for the colorful days and the togetherness for two years lecturing in Yogyakarta State University.

Last but not least, my special thanks go to Mona Sintyara and Fadlin Hadini for contribution as peer reviewers who provide me the insight and suggestion in editing this thesis.

Yogyakarta, August 2019
