This study aims to find the best way to improve attached skill on the child's group B3 TK ABA Nitikan Yogyakarta through gradual and continuous training and children can attach object at any particular position nicely.

This type of research is a class action study. The study was conducted the group B3 TK ABA Nitikan which consist of 22 children. Action was done in the form attached exercise gradually, from simple patterns in to complicated patterns on an ongoing basis. Data analysis techniques use descriptive qualitative and quantitative.

From the research it is known that the kindergarten boy group B3 ABA Nitikan proficient can stick with good, clean and tidy through gradual continuous exercise. Continuous gradual exercise consists of three phases of the cycle of activities, namely (1) cycle I stick to a simple patterned paper freely, (2) cycle II attached patterned paper rectangles, triangles, parallelograms and circles, in the frame larger than the pattern, (3) cycle III patterned paper attached rectangles, triangles, parallelogram and circle, in exactly the same frame size. This can be seen in the improvement of each activity cycle, where in the cycle I for 31.81% of children who can stick with a neat and clean. In the second cycle of 68.18% of children who can stick with a neat and clean. And the cycle III amounting to 95.46% of children who can stick with neat and clean.

Key words: stick capability, continuous gradual exercise, TK ABA Nitikan
